There is a good deal of variety in the seat & nature of the pain ~~arising~~ which constitutes <sup>different causes</sup> ~~this~~ <sup>the pain</sup> ~~probably~~ depending upon the ~~cause~~ which induces it.

- 1 It affects the <sup>one half or</sup> whole head. In the former case, it is called *hemianura*.
- 2 It affects the fore head, or occiput chiefly.
- 3 It affects the orb of one, or both eyes. I have once observed this to be induced uniformly by bile in the stomach - it was in the late Dr Clark.

-2012-

- 4 The pain is dull & unpeifying.
- 5 It is extremely acute and constant.
- 6 It has remissions & exacerbations.
- 7 It is attended with a sense of something like a shutting & opening of the sutures of the cranium; probably from ~~the~~ chronic spasm of <sup>e</sup> brain.
- 8 The scalp is sore to the touch - it is called "*capitudo ulnosa*". ✓

In all its forms the feet are dry & cold - the face is red, & hot, or pale & cold, & the eye lids fall.

& I believe justly  
= Dr Boerhaave supposes the seat of the  
pain to be in the Dura mater. Dissections  
of persons who have died of the head acthion

Before I proceed to mention the Remedies  
for this disease, I shall ever ask that  
it is cured 1 by time - particularly by  
marriage when it occurs at puberty -  
2 by the separation of the wife between  
the arteries & veins about the 40<sup>th</sup> year  
of life. 3 by labor & a change of pursuits  
of life. 4 by the operation of a stimulating  
or sedative poison. It was cured in a lady  
in this city by a fall upon the ice. It  
was cured by grief in the celebrated Lady  
Rachel Russell induced by grief from the  
execution of her husband Lord Wm Russell.

§ The Remedies for this Disease should be different according to its Causes. It is because so little attention is paid to its causes, that the disease has so often eluded the power of medicine, and the same medicines have done both good & harm in an hundred instances.
